

# Know your personality!

Hi! Do you know who I am? My name is Gaille, and I'm a paper doll. I was a popular toy in the 1970s. Over the past 30 years, a lot of kids have designed different images for paper dolls like me, and, as I have met different people every day, I have got to know them and to understand their different personalities by the games they play.

So come and answer the questions below and let me analyse what type of person you are! Remember, you can **travel through time** and take part in games and pastimes from different eras.

15-20 😊 You are an extrovert and gregarious child. You definitely believe that "happiness that is shared is greater than happiness on your own". You like to take part in activities with other people.

10-14 😊 You have a character that is a mixture of both extrovert and introvert. When you want to be active, you go and take part in activities with other people. But there are times when you like to be quiet and alone, and then you enjoy doing things by yourself.

5-9 😊 You are an introvert child and are quite happy to do things on your own. Why don't you try and join in with other kids? Playing with friends can mean having twice the fun!

## Sharing

- This "Know your personality" test is just a game, which has been designed as a way to compare and contrast Hong Kong's popular entertainment of the past and the present. We hope that after you have enjoyed the exhibition and finished this game, you will have learnt something about this topic.
- We suggest that you share the reasons why you prefer certain activities with your teachers, classmates, family and friends. Then try and work out what the main characteristics of each of these forms of entertainment are.
- You can even invite your friends to take part in the different games and pastimes and share the fun with them!
